

# Euraqua Spring?? (Well it is meant to be) Newsletter 2018

## Improved RO Waste Recovery

We are proud to announce an expansion to the options available on our RO's with immediate availability. Any new RO (big or little) can have the waste recovery option fitted and halve the waste water produced.

Waste production from the RO will drop from 25% of the feed to 12.5% with this option which will cost an extra 12.5% of the RO sale price. Please contact Alastair in the office for further information

## New Staff

**Great news!**  
Nathalie Powers is joining us as our new Sales Engineer from the 5th March.

She brings with her a wealth of sales experience in various backgrounds including water treatment. Nathalie will be contacting all our customers over should you wish to contact her. Nathalie's email: the next few weeks to say hello. In the meantime she will be more than happy to take your phone calls  
Nathalie.powers@euragua.co.uk

## Old Staff

Unfortunately Jason has chosen to leave us from 8th March. Hard to believe we know, but we wish him well and hope he enjoys his new career.

## Old Product

Despite our vigorous and continued protests Pentair have discontinued the 2510 news is we stocked up

valve. The good prior to the product being stopped so we have extra stock. When the time eventually

comes that we run out of stock we have either the 2750 or Clack WS1 as a replacement. Please call Gary or Mark in the office to discuss.

## New Product

We have expanded our UV range to include the Atlas range of UV's covering 0.7 to 9.1 m3/hr which comes with a user friendly colour LCD display. It can be customised from a simple UV with day counter to inc solenoid option, uv intensity monitor and alarm output. Plus each lamp comes with a unique chip that is required by the controller at lamp change ensuring that any new lamps are brought from a reputable source, maybe the original UV supplier?? Please ring Mark or Gary in the office to discuss.
