Unbeatable Water Treatment Service

Product Update

Fleck SXT Boards

Pentair are no longer manufacturing SE digital boards for their range of valves. The digital versions will now be offered with the SXT. As you may know, there were issues with the SXT board on duplex valves. Pentair are now confident that these issues have been resolved.

Existing SE boards that develop a fault can be replaced with an SXT timer. The full timer is required as the casings are different.
