Unbeatable Water Treatment Service

PRODUCT UPDATE

PH CORRECTION

JURAPEARLE

We were pleased to offer Jurapearle as an alternative PH correction media in our new price list. So far all feedback has been positive in particular in the tendency for Jurapearle to maintain it's shape better and not turn into "concrete" as can happen with some alternative PH Correction media's. We have even better news in that we have been able to source Jurapearle at a better price enabling us to **reduce the price per bag by £ 2.71** with immediate effect. Please find attached the Jurapearle and Resin pages with the new prices for your records. All discounts for 10 bags or a pallet etc are still applicable at this new low price.

Technical Details of Jurapearle

Applications:-

- pH adjustment
- CO2 removal
- Removal of Iron and Manganese

Chemical Composition:-

- CaCO3 98.1%
